

# MANAGING YOUR BACK OFFICE HAS NEVER BEEN EASIER...

SupportHub360 is an Australian owned and managed technology outsourcing company. Based in Perth, Western Australia, and state of the art support center in Kochi, India, we are a unique team of exceptionally skilled IT Professionals, designers, and developers who keep close tabs on the market to ensure you are getting the industry best support solutions around the clock, 365 days.

SupportHub360 can manage your companies back office such as IT support, digital marketing, application development and support on a reduced cost (Approx.70% lesser on your current running cost). We also provide 24/7 support, 365 days a year.

Some of the services we offer are,

- Technology support center - Remote infrastructure management
- Voice & chat support
- Data center & NOC monitoring
- 24/7 ServiceDesk support
- Leasing of trained technology resources
  - IT support officers
  - Network & Server engineers
  - System integrator
  - Software developers
  - Web developers
  - Mobile application developers
  - Database administrators
  - Information security professionals

SupportHUB360 works like an extension of your office. You can have a shared resource or your own employee working from our support centre. Our state of the art support centre is equipped with latest physical and technology infrastructure, which you can monitor your staff through out the day.
